PROFILE

Frontend Developer with nearly 4 years of experience maintaining and extending responsive web applications for large-scale enterprise clients such as Nestlé and Ford, spanning 25+ European markets. Strong in HTML, CSS and JavaScript, with a focus on accessibility, UI implementation and cross-browser behavior. Working experience in React, TypeScript and Next.js codebases (extending existing components, fixing bugs, UI changes); experienced with AI-assisted tools.

WORK EXPERIENCE

Senior Frontend Developer — VML, Prague, Czech Republic *Jun 2025 – Present*

Client: Nestlé

- Maintain and extend 30+ enterprise websites across 20+ European markets, each localized for its target country, delivering UI/UX improvements, asset implementation, and bug fixes in HTML5, CSS3 and JavaScript, within React, Next.js and TypeScript codebases (Tailwind CSS, Vite).
- Integrate AI-assisted tools (Cursor, ChatGPT, Claude) into the development workflow, using them to streamline QA and content updates and to bring 30+ websites into full compliance with international accessibility standards (ISO/IEC 40500 / WCAG), raising average text contrast ratios from as low as 1.5:1 to 5–6:1 for WCAG 2.1 AA compliance.

Junior Web Developer — VML, Prague, Czech Republic *Jun 2023 – Jun 2025*

Clients: Ford, Danone, Komerční banka, Dr. Max, British American Tobacco, NIVEA, Česká spořitelna

- Led the migration of 30+ Ford Europe websites, each localized for its target country, from design system 2.0 to 3.0 using Adobe Experience Manager, HTML5, CSS3, and JavaScript.
- Built automation with AI-assisted tools (Cursor, ChatGPT) for Ford and Danone to update recurring elements (text, links, buttons) across dozens of pages at once, cutting total update time down to roughly what a single page used to take.
- Maintained live production sites and resolved bugs, delivering ongoing UI/UX improvements and asset implementation.
- Built responsive email templates and landing pages from scratch in Salesforce Marketing Cloud for marketing campaigns (Komerční banka, Dr. Max, British American Tobacco, NIVEA, Česká spořitelna), including dark-mode support and JavaScript-based segmentation compatible with legacy and modern email clients.

Email Developer — Kindred, Prague, Czech Republic *Jan 2023 – Jun 2023*

Clients: Renault, Kiehl's

- Built 15+ responsive HTML/CSS/JS email templates and landing pages for Renault, plus additional campaigns for Kiehl's, from scratch in Salesforce Marketing Cloud, with dark-mode support and JavaScript-based segmentation across legacy and modern email clients.

SKILLS

Core: HTML5, CSS3, JavaScript (ES6+), Accessibility (WCAG 2.1, ISO/IEC 40500)

Working knowledge: React, Next.js, TypeScript, Vue.js, Node.js
